This story centers around Tomoyo who has been there, done that, and now he wants to live in the present and at the beach. He is an NEET, meaning that he is not looking for a job and is content with living life in a non-committal way. Since he feels at home at his grandmother's beach resort, he decides to stay there this summer and he doesn't have a plan of action yet. His main problem is that he is in love with his grandmother's new right hand, Yosuke, but he cannot tell him about his feelings because she is like a mother to him. Since he is not looking for anything serious just yet, he is anxious to try life for a bit and see what happens. This is a very lengthy game, with a number of different paths that you can choose from. You start with a few different choices, each one leading you to a different'solution' to the problems that have come your way. As you continue through the story, you will be able to do different choices, and ultimately have several different endings. Some are good, some are bad, and some are even very surprising to the point that you will be shocked. If you have played any of my other games, you should remember what these endings are like. This is the only one to date with such a number of different paths. Each path has a different ending and'solution' to the problems that he faces. The story is not laid out for you, and you need to make choices in the game. However, you are going to be dealing with your brain out a little bit since, given the choice at times between bad and better endings, the choice that you make will be of crucial importance. Since you will be entering different paths to choose from at times, you will be able to think about what happens, and you will be forced to try a little bit of everything. In order to make things confusing, there are several different endings that you can get. The choices you make in the game will either make the ending better or worse. When you choose something that you don't think will help, you will go down in the game. And sometimes that will change your entire landscape. But the paths are not laid out in a way that you don't have to try to find them all. The characters in this game are beautifully drawn, with an animation style that makes for some of the best looking character models I have ever seen. There are several different locations in the

The present invention relates to a card deck with increased flexibility, and an interleaved card deck. More specifically the present invention relates to a card deck including a plurality of substantially horizontal rows of cards, each row of cards having a number of cards and each row being separated from an adjacent row of cards by a gap. The card deck also includes an adjacent row of cards and an additional row of cards. The additional row of cards is sandwiched between the juxtaposed rows of cards at the gap. The card deck may be of the type wherein the adjacent rows of cards are offset relative to each other. Further, the additional row of cards is offset from the adjacent row of cards and the adjacent row of cards is offset from the additional row of cards. The addition of the extra rows of cards and additional placement thereof increases the flexibility of the card deck while maintaining the card deck balance as well as the number of cards retained on a single surface of the card deck. Additionally, the present invention provides a method of making an interleaved card deck wherein the cards of the card deck may be interleaved relative to each other. In the past, interleaved card decks have been constructed based on two well known methods. One method of making an interleaved card deck includes interleaving a top row of cards and a bottom row of cards wherein the top row of cards is offset from the bottom row of cards. This type of interleaved card deck includes at least a top row and a bottom row wherein each of the rows of cards includes at least a number of cards. Yet another method of making an interleaved card deck includes the interleaving of a plurality of substantially parallel rows of cards. This number may be as few as two (2). The parallel rows of cards are interleaved into a multileveled interleaved card deck. Then, another parallel row of cards is added above or below the interleaved row of cards to form the multileveled interle

**Product Description** **Product Description** **Half-Beast / Half-Human Horde** **The Half-Beast Horde is a force of regal bloodsuckers which combine a magical aura with frightening strength and abilities. They are absolutely loyal to the Grey Book, the source of all their power and glory, standing on the advice of the litter and are convinced that no human has the skill or knowledge to replace the Book. Clan Structure** **Your half-beast Horde clan is broken down in to 2 major types, regular half-beasts or the KMS (Kinship of Mortals). KMS are essentially Households of last blood and the like. Human households are the closest equivalent. Half-beasts suffer first from other half-beasts. It's difficult for a half-beast to see out of the tusks, horns or maybe even the eyes of another. They are frankly shunned by the planetary population due to the fact that this makes them easy prey. Only through the Book are they granted a nomadic kind of lifestyle. Offspring Half-beasts are born with tusks. These are males from females with psychic ability. Females are born with cloven hooves and just claws. Both these are average in length and not as strong as their male counterparts. Being half-beasts is highly hereditary through mother and father, if they have tusks then their son's will also. It's an almost surety, often from the first generation. The most obvious example of hereditary tusks is Brugh. Physical Description** **Half-beasts are larger than humans, but due to the fact that when they are born half-man, half-beast they have a ~40% stronger attitude. They are also clawless, their claws being shed as they mature. Half-beasts have average human heads with their eyes enlarged. There is also some bruising to the eyes during character creation. Half-beasts are bigger than humans. Most half-beasts are the size of a small human and reach the stature of a large man, but there are also the larger, massive growths. These large forms of the half-beast are the result of cruel lab-incubations that have occurred over hundreds of years, making them very powerful. There is some discrepancy as to whether or not tusks grow in the same style as half-beasts or if they grow in the normal humanoid**

So, obviously this doesn't work when you import it in, but if you try it out on your computer, you should find that it works in the background, just so you can get a feel for it. Be warned that the book can be very processor-intensive, especially if you plan on playing a lot of characters and creating a monster companion for them, so it might take a while for your computer to bring the book in, or bring it to the front of the list while it loads.
